

Challenging the traditional methods of the industry.

CAPABILITY STATEMENT

— KEAN ENERGY RESOURCES

Kean Energy Resources is a leading Industrial Services company specialising in industrial abrasive blasting & protective coatings including composite repairs, heavy fabrication, mechanical fitting, special class welding, rope access and scaffolding services tailored to meet the demands of industries such as Oil and Gas, Mining, Marine, Construction and more.

Our Turnkey Fabric Maintenance Solutions offer a comprehensive, all-in-one approach to maintaining and servicing oil and gas infrastructure, overhead/ underground pipelines, pipe racks, storage tanks, and all types of steel structures across multiple industries to guarantee their safety, longevity and overall performance.

Safety and compliance are at the forefront of our business undertakings. We prioritise regulatory compliance, environmental stewardship, and worker safety in all operations, consistently implementing best practices to minimise risks.

— Our Turnkey Fabric Maintenance Solutions

Our expertise in accessing challenging locations ensures that we can perform maintenance with minimal disruption to ongoing operations. We utilise advanced equipment and techniques to navigate tight spaces and difficult terrains.

Our Turnkey Fabric Maintenance Solutions offer a comprehensive, all-in-one approach to maintaining and servicing oil and gas infrastructure, overhead/underground pipelines, pipe racks, storage tanks, and all types of steel structures across multiple industries to guarantee their safety, longevity and overall performance. These solutions typically include installation, routine maintenance, break-in works, inspections, and any necessary repairs. By opting for turnkey fabric maintenance solutions,

client time and resource requirements are reduced, and structures remain in optimum condition throughout their lifespan, minimising downtime and maximising efficiency.

We prioritise worker safety by implementing advanced techniques to mitigate risks associated with working at heights, ensuring compliance with Safe Work regulations.

INDUSTRIAL

— Services We Offer

Industrial Abrasive Blasting & Protective Coatings

- › Abrasive Blasting/ Wet Blast/ Mixed Media.
- › Protective coatings, linings, fireproofing, and anti-corrosion systems applied to the highest standards and client specifications.
- › Highly skilled coating technicians and NACE (1, 2 & 3) inspectors.
- › Application according to client requirements & specifications.
- › Asset surveillance and integrity reporting.

Mechanical Services

- › Precision installation and assembly - fitting of mechanical components, piping, structural systems, and rotating equipment.
- › Shutdowns, Maintenance, and Upgrades.
- › Onsite machining and flange facing.

Special Class Welding

- › High-Precision Welding Solutions.
- › Certified Welders and Inspectors - AS 1796 Special Class Certification and AWS standards compliance.
- › Critical Weld Testing and QA/QC.
- › Custom Fabrication and Repairs.

Scaffolding Services

- › Full-service design, erection, modification, and dismantling of scaffold systems.
- › Undertaken by highly skilled personnel.
- › Daily inspections, detailed safety plans, and zero tolerance safety culture.

Rope Access

- › Cost effective access solutions, with rapid mobilisation and demobilisation capabilities.
- › IRATA certified personnel.
- › Confined space access: safe entry to work in tanks, silos, and other restricted environments.
- › Rescue services.
- › Make safe - dropped object surveillance.

Adelaide Based Fabrication Workshop

Light to heavy duty welding fabrication workshop. Please contact us to discuss any upcoming work requirements.

Adelaide Based Warehouse Facility:

- › Over 2000m² of yard storage and 2500m² warehouse space with overhead crane to cater for heavy, oversized shipments.

Our Commitment to Compliance, Safety & Quality

At Kean Energy Resources, quality workmanship, safety and compliance are at the forefront of our business undertakings.

We prioritise regulatory compliance, environmental stewardship, and worker safety in all operations, consistently implementing best practices to minimise risks. Our inhouse health and safety processes and procedures are in line with the international standard ISO 45001:2018.

We invest in our workforce through continuous training programs that emphasise the latest safety practices, technologies and industry standards. We conduct regular competency assessments to ensure our team remains at the forefront of industry developments.

We are committed to delivering services with the highest standard of excellence by continually monitoring, evaluating and improving our processes. We uphold and document this commitment through our Quality Management System (QMS) which is in full compliance with the international standard ISO 9001:2015.

Kean Energy Resources has attained ISO 9001 certification through TQCS International. The external auditing process serves as an independent verification that our internal procedures are effective, compliant, and aligned with industry standards.
